

PHISHING AWARENESS

TASK 2: Phishing Awareness Training - Complete PDF Content

Phishing Attacks: Recognize, Report, and Stay Safe

CodeAlpha Cyber Security Awareness Training

Muhammad [Your Name] | August 2026

`@CodeAlpha Internship

SLIDE 2: WHAT IS PHISHING?

Phishing ek cyber attack hai jisme attacker fake email, SMS, ya website bhej kar aapka:

- Password
- Bank Details
- OTP
- Credit Card Info

chori karta hai.

Simple words: "Fraud wala message jo real lagta hai"

SLIDE 3: COMMON TYPES OF PHISHING

1. Email Phishing : Fake bank/email alerts
2. Spear Phishing : Khaas person ko target karna
3. Smishing : Fake SMS/WhatsApp links
4. Vishing : Fake call karke info mangna
5. Website Phishing : Fake login page
`faceb00k.com`

SLIDE 4: HOW TO RECOGNIZE PHISHING EMAILS

*RED FLAGS

1. Wrong Sender: `support@paypal.com` - 'I' ki jagah 'I'
2. Urgent Language: "Account will be BLOCKED in 24 hours!"
3. Bad Grammar: Spelling mistakes
4. Suspicious Link: Hover karo to `http://netflix-free.net` niklega
5. Attachments: `.exe`, `.zip` files

SLIDE 5: REAL WORLD EXAMPLE

Fake Email:

From: noreply@netflix-security.com

Subject: Your Netflix Subscription Expired!!!

Click here to update: <http://netflix-update.net>

Problem: Netflix ka real domain = `netflix.com`

`netflix-security.com` = FAKE

SOCIAL ENGINEERING TACTICS

Hackers aapko emotionally trap karte hain:

1. FEAR - "Your account is hacked!"
2. URGENCY - "Act Now! 10 minutes left"
3. TRUST - "From your CEO/Bank Manager"
4. GREED- "You won 5000 PKR! Click now"

SLIDE 6: BEST PRACTICES TO STAY SAFE

- ✓ Check sender : email carefully
- ✓ Hover over links: before clicking
- ✓ Enable 2FA : Two Factor Authentication
- ✓ Never share OTP: on call or SMS
- ✓ Update antivirus regularly
- ✓ When doubt, go direct to official website
